

AbbVie is a highly focused, research-driven biopharmaceutical company.

We're a company that takes on some of the toughest health challenges. And we do more than just treat diseases – we aim to make a remarkable impact on people's lives.

As a new biopharmaceutical company, AbbVie combines the expertise of a recognised pharmaceutical company with the focus and innovative spirit of a biotech. Through a targeted, patient-centric approach to research and development, AbbVie accelerates new scientific discoveries to address some of the most complex diseases in the world, while our services and partnerships help us create greater access and outcomes for the health of all Australians.

Focus matters

We focus on discovering, developing, and delivering medicines in therapeutic areas where we have proven expertise and where we can have an impact. These areas include:

Immunology Oncology
Virology Neuroscience

Impact on patients

AbbVie helps patients throughout their journey.

We always look beyond the products we make in order to find better solutions for patients. In Australia, we have created patient support programs that go far beyond basic disease information. These programs enable patients to remain as active and independent as possible and ensure optimal care.

20+

Conditions treated across infant, adolescent, adult and senior stages of life in Australia.

14,000+

Australian patients supported through our Patient Support Programs.

AbbVie is committed to helping patients.

28+ million

Patients treated by AbbVie's medicines in 2018 globally.

200+

Countries where our products help patients.

31,000+

Australians currently benefiting from our medicines.

Compassionate access to medicine.

3,700+

Patients in Australia and New Zealand have been given compassionate access to our medicines in the last four years.
